

# HM-290

# 3 in 1 Floor Standing Dispenser

## Product Specifications

Colours	White / Grey
Filtration	Multi-Stages Filtration System
Capacity	Hot 16L/hr at > 90°C Cold 15L/hr at < 10°C Ambient 20L/hr at < 40°C
Power	Hot 600W / Cold 125w
Supply	230Vac 50Hz
Pressure	0.05MPa - 0.39MPa
Weight	22kg
Dimensions	26 (W) x 43 (D) x 110 (H) cm

Made in Taiwan

## Product Features

- True ABS Body
- Over Temperature Protection
- Leakage Circuit Breaker
- Front LED Indicators
- Continuous Flow Feature
- Food Grade Stainless Steel Tanks
- Hot Water Temperature Display

Available in

Grey White

# Filter Specifications

## Filter Cycle Replacement (Recommended)

Full Set (Sediment, Pre-Carbon, Post Carbon, UF Membrane)

9-12 months, depends on inlet quality and usage

### Sediment Pre-Filter

#### Material (South Korea)

Pre-sediment filter maximizes the water purification effects from initial stage by removing completely various settings, microorganisms, oxidized substance to include rust, sand, dust and microscopic impurities of even one micron size.

### Pre-Carbon Filter

#### Material (Japan)

Carbon filter uses activated charcoal water close to natural water by absorbing or removing most chemical substances such as chlorine content and odor produced in the course of processing tap water.

### Ultra-Filtration Membrane

#### Material (US) 0.01 Micron

Microscopic ultra-filtration filter allows the passage of only clean water containing mineral contents after removing the viruses, germs, bacteria, most other contaminants and impurities remaining in the water.

### Post-Carbon Filter

#### Material (Japan)

Helps to remove unpleasant residual smell, restoring purified water taste that is suitable for consumption
